## Delmar Learning's eCourses

*Delmar Learning's eCourses help prepare patrons and students for a career as a cosmetologist, electrician, and automotive technician. They can also help nurses maintain their license with accredited continuing education credits.*

---

### Milady Test Prep

---

A complete test-preparation course for Cosmetology State Board Licensing Exams, which includes:

- Over 1,300 multiple-choice questions.
- Information in the 2004 edition of *Milady's Standard Cosmetology* textbook.
- Multiple study modes: Review mode gives immediate feedback and rationales for both correct and incorrect responses; exam mode stimulates actual test situations by providing scoring at the end of the exam.
- Links embedded into the system take the student back to the specific entry in the textbook to further reinforce key topics and procedures.
- Practice tests, chapter-specific tests, or comprehensive exam options.

---

### Journeyman Prep Test Prep

---

A complete test-preparation course for the journeyman electrician's licensing exam, which includes:

- The option to take an open- or closed-book practice exam.
- A pool of over 2,000 electrical questions.
- Non-timed tests, which pull 25 randomly, selected questions from the section the patron is working on.
- Timed tests which allow the user to see the time for the test in half-hour increments.
- Interactive, pop-up NEC spreadsheet-style calculators that are delivered on-line.
- Test results which display the number of questions answered correctly and incorrectly with a percentage score.
- A detailed review of each question answered.

---

### ASE Automotive Test Prep

---

A complete test-preparation course, reviewed and researched by ASE master technicians, for automotive technicians seeking certification via the ASE exams. Included in this eCourse are animations, video, immediate remediation, and administrative tools for setting benchmarks and evaluating performance. It offers:

- Two different study options so patrons can choose their study method each time they sign on.
- Practice questions and sample tests, which provide helpful hints, right and wrong answers, and links to further reading.
- Detailed reports including test results, feedback and further study information.

---

### Nursing Continuing Education

---

Nursing Continuing Education eCourses provide 50 accredited nursing courses (from 1–3 credits each) that enable nurses to satisfy requirements for license renewal by the State Board of Nursing. Test questions are in multiple-choice and true/false format. Text, graphics, and photo images are used throughout.

These courses meet the highest standards of quality and accreditation by American Nurses Association Credentialing Center (ANCC). These eCourses offer the following features:

- Ready for submission to the State Board.
- Unique courses in high demand and hard to find elsewhere.
- Users can keep up their certification without having to leave their home or community.
- Undergraduate nursing students can be awarded a nursing continuing education (CE) contact hour certificate following successful completion of the CE program activity.
- Students enrolled in allied health schools may also be awarded credit.
- Users may print out the certificate after course completion.
